

### **Poojaben Darji**

#### **What motivated you to study Engineering and IT? People who influenced your decision**

My motivation to study Engineering sparked from my interest in Physics and Technology in high school. Getting involved in industry and university programs focusing on Engineering also reflected my passion. Through these programs, I met several Engineers diving into the field of robotics that influenced my direction into Mechatronic Engineering. My parents constantly inspired my interest in STEM by providing positive direction and resources.

#### **What would you like to do after your studies?**

Studying at UTS has given me a broad range of practical experiences through labs and internships providing me with inspiring role models in the engineering field. I am keen to take my skills into the robotics industry utilising them in impactful projects that work to solve community needs.

#### **Impressions of the International Summer School**

Going to HTW Berlin Summer School was an amazing learning opportunity; the highlight has definitely been meeting the fellow students and exploring key places in Berlin.
